PROFESSIONAL SUMMARY

Civil Engineering student pursuing a Bachelor of Science at San Francisco State University, with a prior Diploma in Civil Engineering and hands-on experience supporting civil, structural, and construction projects. Experienced in preparing and interpreting engineering drawings, quantity takeoffs, structural modeling, field inspections, construction documentation, and coordination with contractors and project teams.

EDUCATION

San Francisco State University <i>Bachelor of Science in Civil Engineering</i>	San Francisco, CA Jan 2022 - Dec 2026 Expected
Tri Juddha Technical Secondary School <i>Diploma in Civil Engineering (4-Years)</i>	Nepal 2018 - 2021

TECHNICAL SKILLS

- Structural Engineering:** Structural analysis, reinforced concrete design, steel design, foundation design, load-path evaluation, structural calculations, and seismic design fundamentals
- Existing Buildings and Field Work:** Existing-condition documentation, field measurements, site inspections, condition observations, construction progress verification, and deficiency reporting
- Design and Modeling Software:** SAP2000, ETABS, Revit, AutoCAD, Civil 3D, RISA, Bentley RAM, STAAD Pro, Lumion, Enscape and MicroStation fundamentals.
- Construction Documentation:** Engineering drawings, plans, elevations, sections, structural details, RFIs, submittals, shop drawing review, quantity takeoffs, and cost estimation
- Codes and Standards:** Academic familiarity with ASCE 7, California Building Code, ACI 318, and AISC steel design provisions
- Project and Collaboration Tools:** Bluebeam Revu, Adobe Photoshop, Microsoft Project, P6, Microsoft Excel, Microsoft Word, PowerPoint, Adobe Creative Suite, Notion, technical reports, and project coordination.
- Programming and Automation:** Coding fundamentals, API integration, AI-assisted engineering workflows, and Revit task automation

EXPERIENCE

- | | |
|---|--|
| Structural Engineering Intern
<i>Pennoni Associates</i> | Jun 2026 - Aug 2026
<i>Philadelphia, PA</i> |
|---|--|
- Performed structural load calculations (gravity and lateral) for reinforced concrete and steel building systems in accordance with IBC and ASCE 7.
 - Built 3D structural models, framing plans, and detailed construction drawing packages utilizing Revit Structure.
 - Supported finite element analysis and drift/deflection evaluations in ETABS and SAP2000, while coordinating cross-disciplinary clash detection.
 - Supported senior engineers during site condition assessments, documenting structural element conditions and assisting in compiling investigation and inspection reports.
- | | |
|--|-------------------------------------|
| Construction Supervisor
<i>Nepal India Custom Office</i> | Jul 2024 - Aug 2024
<i>Nepal</i> |
|--|-------------------------------------|
- Supported day-to-day construction activities for a 2,000 sq ft government facility by coordinating subcontractors, material deliveries, labor, and site activities.
 - Participated in site walks and inspections to document progress, identify construction issues, and report updates to the project lead.
 - Assisted with daily and weekly schedule tracking and followed up on constraints involving materials, workforce availability, inspections, and site access.
 - Supported construction documentation, contractor communication, field coordination, and resolution of site-related questions.
- | | |
|--|--|
| Assistant Civil Engineer
<i>Hi Tech Civil Design Consultancy</i> | Jun 2020 - Jul 2021
<i>Birgunj, Nepal</i> |
|--|--|
- Reviewed existing site conditions, collected field measurements, and documented construction progress during site inspections.
 - Supported structural modeling and engineering calculations using SAP2000 and other design tools.
 - Prepared quantity takeoffs and preliminary cost estimates for concrete, reinforcing steel, masonry, and structural work packages.
 - Coordinated with contractors to clarify drawings, resolve constructability questions, and document field issues.

IT and Audio Visual Technician

Apr 2022 - Present
San Francisco, CA

Associated Students, San Francisco State University

- 🔧 Set up, tested, and maintained audio-visual and technical equipment for meetings, events, classrooms, and university facilities.
- 🔧 Troubleshoot technical issues in fast-paced environments while communicating clearly with staff, students, and event organizers.
- 🔧 Maintain equipment records, document service issues, and coordinate technical support activities across multiple teams.

SELECTED PROJECTS

Civil and Structural Design Projects

2020

- 🔧 Developed civil and structural models, layouts, and drawing sets using AutoCAD, Civil 3D, Revit, SAP2000, and ETABS.
- 🔧 Prepared foundation layouts reinforced concrete details, structural framing models, and supporting engineering calculations.
- 🔧 Interpreted engineering drawings and applied academic knowledge of structural loads, concrete design, steel design, and construction documentation.

Transportation Systems Analysis, ENGR 438

Fall 2024

- 🔧 Analyzed San Francisco State University commuter survey data, transportation accessibility, and service reliability trends.
- 🔧 Developed recommendations connected to accessibility, sustainability, and climate transportation goals.
- 🔧 Created charts, technical summaries, and presentation materials for stakeholder review.

3D Structural and Architectural Modeling

2018 - Present

- 🔧 Created architectural and structural building models in AutoCAD and Revit and produced visualization outputs in Lumion.
- 🔧 Prepared plans, elevations, sections, and three-dimensional models to support design review and project communication.

Kalash Cattle Farm: Foundation and Steel Work

Feb 2021 - Jul 2021

- 🔧 Supported foundation planning, layout, reinforcement work, steel installation, and daily field supervision.
- 🔧 Completed material quantity takeoffs and assisted with planning concrete, reinforcing steel, and construction materials.
- 🔧 Helped reduce material waste through improved quantity planning, contributing to reported savings of approximately 5–7%.

LEADERSHIP & AFFILIATIONS

Member, Structural Engineers Association of Northern California

Oct 2025 - Present

- 🔧 Participate in professional events and technical programs to expand knowledge of structural systems, seismic design, engineering practice, and industry workflows.

Team Lead, On-the-Job Training in Civil Engineering

2021, Nine Months

- 🔧 Led a 14-member technical team by assigning tasks, tracking, and supporting timely project completion.
- 🔧 Conducted regular team check-ins, provided feedback, and improved coordination between technical team members.
- 🔧 Contributed to an estimated 15% improvement in task efficiency through clearer assignments and consistent progress monitoring.

ADDITIONAL SKILLS

- 🔧 **Structural Interests:** Existing-building assessment, seismic retrofit, structural repair, renovation, adaptive reuse, emergency stabilization, and building expansion
- 🔧 **Field Capabilities:** Site observations, field measurements, photographic documentation, condition reporting, and communication with contractors and project stakeholders
- 🔧 **Communication:** Technical writing, engineering reports, client-facing communication, design presentations, and multidisciplinary teamwork
- 🔧 **Professional Development:** Preparing for the FE examination and interested in pursuing California EIT
